Use-Case Flow Specification

Use Case: Receive Order Webhook

Use Case ID: UC-01

Primary Actor: E-Commerce Platform (Shopify / WooCommerce)

Supporting Actor: Supplier Partner

Preconditions:

1. The E-Commerce Platform is connected to the Dropshipping Inventory & Order Orchestrator.
2. The supplier API is available for inventory verification.
3. A valid customer order has been placed on the E-Commerce Platform.
4. The order webhook contains the required order and product information.

Postconditions:

1. The order has been successfully processed by the system.
2. Supplier inventory has been verified for the ordered products.
3. Required supplier purchase orders have been dispatched.
4. The order is recorded with the relevant supplier information for further tracking.

Main Success Scenario:

1. The E-Commerce Platform sends an order webhook to the system.
2. The system receives and parses the incoming order webhook.
3. The system identifies the products and their corresponding suppliers.
4. The system verifies the availability of each ordered product through the supplier API.
5. If the order contains products from multiple suppliers, the system splits the order into separate supplier orders.
6. The system creates the required supplier purchase orders.
7. The system dispatches the purchase orders to the corresponding Supplier Partners.
8. The system records the supplier order information.
9. The system completes the order processing flow successfully.

Software Engineering Lab-01

Alternate Flow – Supplier SKU Unavailable

1. The system receives and parses the order webhook.
2. The system checks the availability of the ordered products with the Supplier Partner.
3. The Supplier Partner reports that a required SKU is out of stock.
4. The system does not dispatch a purchase order for the unavailable SKU.
5. The system marks the affected order or item as unable to be fulfilled.
6. The system notifies the E-Store Owner about the unavailable product.
7. The order processing flow ends without dispatching the affected purchase order.
